

How to back up your database ?

Protect your Business

Your POS Database stores all your Sales data and reports

Database backups are essential for protection against data loss that can completely disrupt business operations. We recommended that you should back up your database at least once a month .

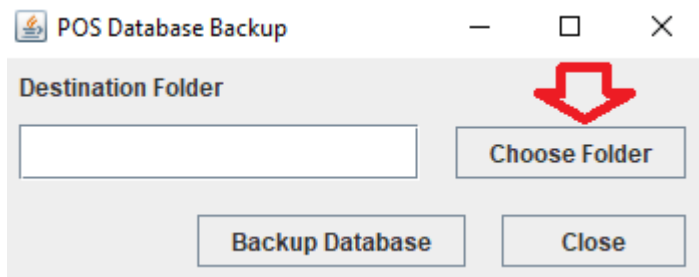

1 . Insert a USB drive to the POS

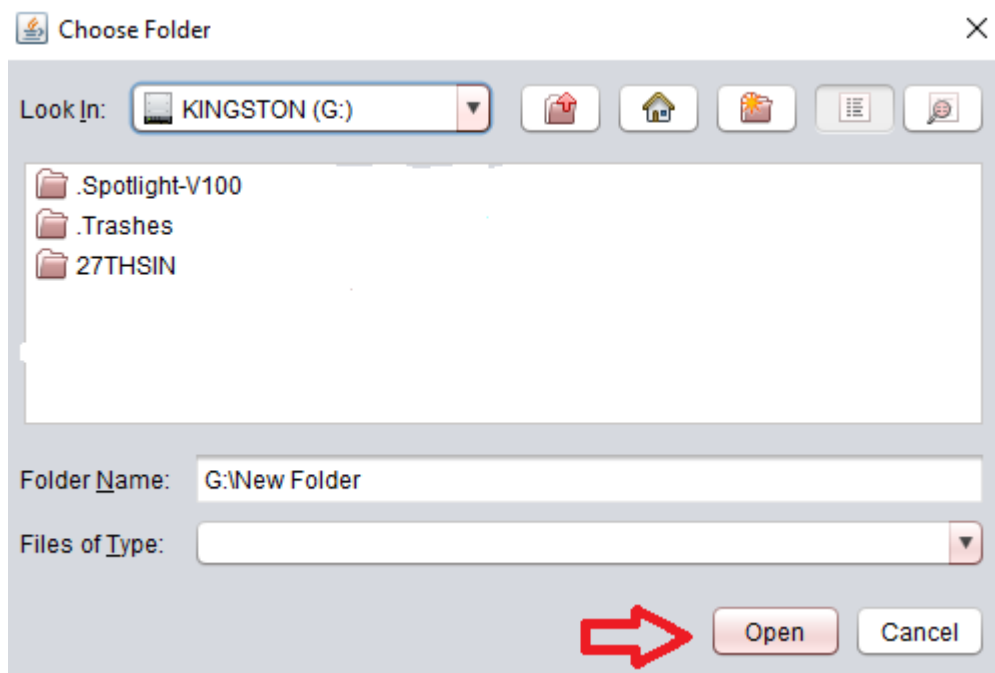

2 . Click on Backup database in TSG RIS

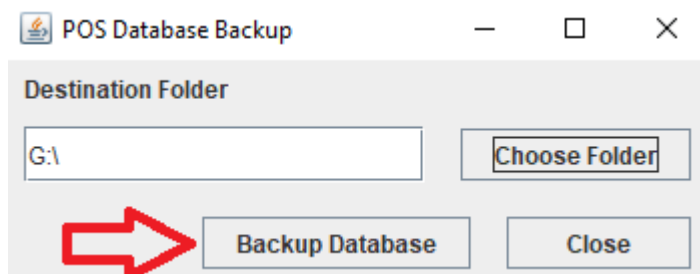

3 . Click on Choose Folder

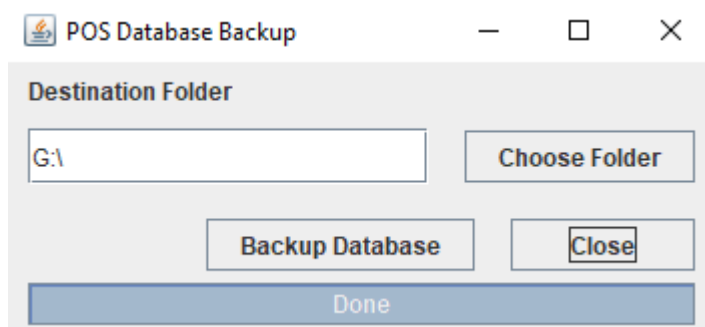

4 . Select your USB drive and click on open

5 . Click on Backup Database.

6 . Wait for the process to be completed .

7 . Now your database has been backed up and saved in USB
